NOTICE

Roses.—We call the attention of our friends that in our Handbook of Plants we devote much space to the "Queen of Flowers." We catalogue several hundred **Tested** varieties, and purchasers can make no mistake in selecting from the printed lists. We make Roses our specialty and we devote many acres to their culture. We have discarded all the poor sorts and we place before you the finest varieties extant. Most people are disgusted with cheap Eastern-grown stock, for the varieties are generally not suited to California, and the plants invariably weak and forced in hothouses. We sell only **Strong Two-year-old Plants** that are bound to give satisfaction wherever planted. Our many years' experience in this line will be devoted to the wants of our customers, and any queries by mail will receive prompt and cheerful consideration.

Ornamental Trees and Plants.—Our stock is full and complete in Shade and Ornamental Trees and plants and Flowering Shrubbery; also a very large assortment of **Sidewalk Trees and Palms.**

Fruit Trees and Small Fruits.—We are devoting much space in our nurseries to the culture of Fruit Trees and Small Fruits. In this Handbook will be found an assortment of the best varieties. Orchardists or parties intending to plant on an extensive scale should write us for special prices.

House Plants.—We invite inspection of our stock. We have a very large assortment of Hardy House Palms, Ferns, and other desirable plants, which will be found under the proper heading.

Seeds and Bulbs.—This department is one of the best equipped on the coast. We are thoroughly up to date and carry an immense line of Flower, Vegetable, and Grass Seeds. Our store is worth a visit to any one interested in fine cut flowers, the latest in floral designs, fancy baskets, or a complete assortment of florists' supplies.

Terms of Sale.—The terms herein quoted are **Cash.**

In ordering, please give full and explicit directions as to the route and manner in which goods are to be forwarded, as our responsibility ends on delivering at Railway Station or Express Office.

The E. Gill Nursery Company gives no warranty, express or implied, as to description, quality, or productiveness, or any other matter, of any Seeds, Trees, Bulbs, or Plants they send out, and will not be in any way responsible for the crop. If the Purchaser does not accept the goods on these terms, they are at once to be returned.

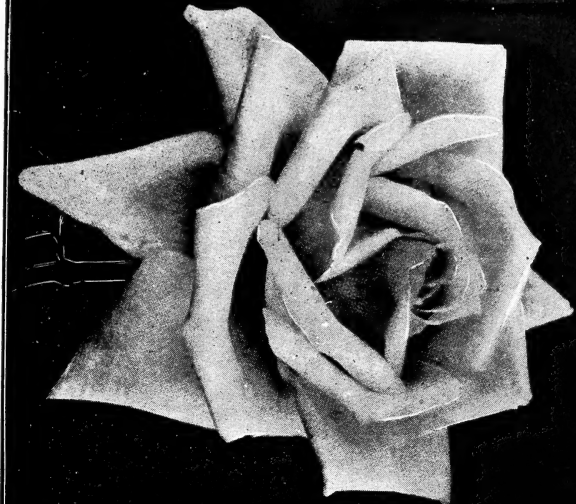

Purchasers should state by what mode of conveyance they wish to have their goods shipped. When no route is designated, we use our judgment.

Remittances may be made by check or draft on San Francisco, Oakland or West Berkeley, or by registered letter or money order on Oakland or West Berkeley, Cal.

Climbing White Mamam Cochet

The most valuable acquisition to our Climbing White Roses in the past few years is Climbing White Mamam Cochet. Identical with the older variety in size, form and color it has further proven to be one of the most profuse and continuous bloomers, strongest growers, of clean habit, glossy foliage and the flowers are borne on long, stiff, straight stems. These excellent points together with its freedom from mildew make it one of the most noteworthy additions to that class of Roses of which there is never a surplus—Hardy, White, Everblooming Climbers.

With practically 50 years experience and the handling of millions of Roses we are always careful in recommending new varieties, but we have no hesitancy in emphasizing everything we claim for Climbing White Mamam Cochet.

We offer a limited stock of hardy field grown plants that will be ready January 1, 1912, at \$1.00 each or \$9.00 per dozen. Orders filled strictly in rotation.

HOW TO GROW ROSES

Roses will grow in almost any location on this coast. Select, if possible, a somewhat sheltered situation not too close to large trees, whose dense foliage and extending roots absorb all the life-sustaining nutrition of the soil; also bear in mind that everything in the rose department likes the sunshine.

If your soil is poor, it may be made fertile by an addition of loam or well-rotted stable manure. Spade the ground to a depth of about twelve inches and thoroughly mix it, and if there is sufficient moisture any one can have beautiful roses.

When the plants are received, if for any reason it is desired to defer immediate planting, place the plants in a cellar, set them upright and water freely from time to time. Cover the roots with a damp sack. If they have a withered appearance, caused by an unusual delay in transit, soak them in water (tops and roots) for an hour or two before planting, to restore their vitality.

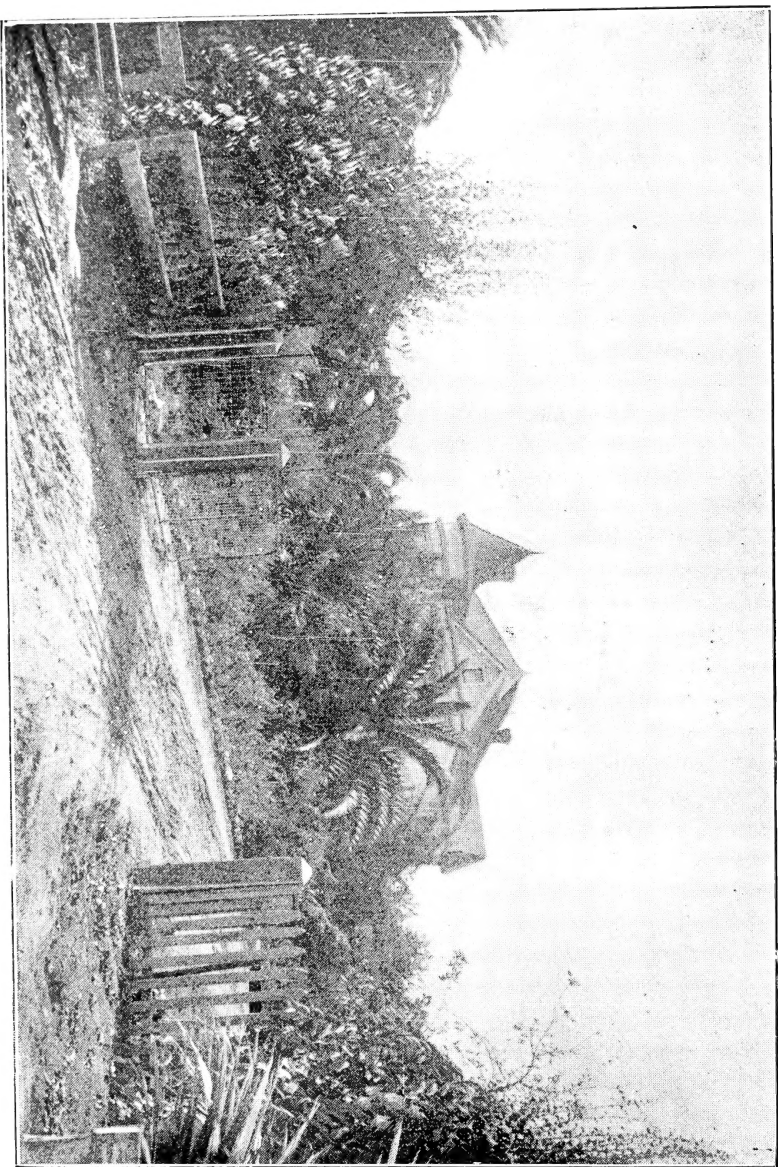

The best time to plant is during the winter and spring. Having prepared the ground do not hesitate to place the roots well below the surface of the soil, arranging them as nearly as possible in their natural position. Cover over, pressing firmly down upon them and in around the stem. After planting, water freely, and if the sun be strong, protect them for a few days with a covering of burlap. Water freely every day until they show signs of having become established. Of course, if the ground is wet this is to be omitted.

Pruning.—The different varieties of roses differ very much in habit of growth. Many are neat and compact, requiring little or no attention, while others of the same class are vigorous and straggling, sending out long shoots which tend to out-run the limits assigned them. Pruning, therefore, is a matter to be governed by the judgment of the planter. We will add, however, that plants of persistent growth should be trimmed back in the early winter about one-half of the season's growth. When plants, apparently healthy, fail to mature the buds which they bear, remove a large percentage of the undeveloped buds and prune back about one-third of the growth; this gives the roots a chance to become vigorous.

We offer nothing but tested kinds of both the new and old varieties, and our stock for this season is stronger than anything ever before offered.

All plants sent out by this establishment will be carefully packed and delivered on board steamship or railroad free of charge.

Parties wishing to have rose blossoms named will find us ready at any time to render assistance. Flowers cut for this purpose should have a portion of the foliage with them. This helps greatly in identifying obscure varieties.

- John Hopper (H. P.)**—Brilliant rose, changing to bright crimson; reverse of petals lilac purple; a fine, large, showy sort; very fragrant.
- Kaiserin Augusta Victoria (H. T.)**—By far the finest of the new white roses; flower borne on long, heavy stems, of the finest ivory white; long, pointed buds; a good grower and a fine bloomer; much used for forcing under glass.
- La France (H. T.)**—Color, satin pink, outer petals pale flesh; has the free blooming qualities of the Tea Rose, and is perfectly hardy; very fragrant, distinct and beautiful.
- Laurette (T.)**—A creamy white, shaded with rose; an extra good bloomer and a valuable sort.
- Liberty (H. T.)**—We consider this the best of all Red Hybrid Teas. Color and fragrance as good as General Jacqueminot, which it much resembles. Blooms as freely as any of the Tea Roses. As a hothouse variety it is unsurpassed.
- Louis Van Houtte (H. P.)**—Crimson maroon; medium size, sometimes large; fine, clear foliage; very free flowering and fragrant; an excellent sort.
- Mamam Cochet (T.)**—One of the finest of the pink roses; color, beautiful silvery pink, changing to deep rose; flowers, large and full and deliciously sweet; one of the best roses we offer.
- Mabel Morrison (H. P.)**—Pure white petals, thick and waxy; a hybrid of Baroness Rothschild; habit good.

Madame Abel Chatenay (H. T.)—Good grower; fine in bud and flower; large and full; petals recurved and of a beautiful creamy-rose, tinged with salmon. A wonderfully bright and pretty rose. Splendid for forcing.

Madame Caroline Testout (T.)—The petals are large and of the elegant La France type; exquisitely edged and bordered with clear silver rose. Both flowers and buds are extra large and of very elegant form; the color is brilliant satiny rose, deepening at center to clear red.

Madame Chedane Guinoisseau.—A valuable and exceedingly beautiful variety; flowers clear golden yellow, large, very full and sweet; buds, long and pointed, opens well; first class in every way.

Madame Eugene Verdier (H. P.)—Bright satiny rose, with silver shading; large double flower with large petals, and good form.

Madame Falcot (T.)—Fine apricot yellow, with beautiful orange buds; much valued for bouquets; tea scented; a constant bloomer.

Madame Gabriel Luizet (H. P.)—Light silvery pink, shading of the edges of petals with white; very free bloomer; a grand flower and very distinct.

Madame Honore Defresne (T.)—Large, bright yellow, good bloomer; clean growth; long buds; very desirable.

Madame Hoste (T.)—Very valuable and exceedingly beautiful; extra large flowers and superb buds, very full and delightfully perfumed; color, soft canary-yellow, deepening at center to pure golden yellow, beautifully flushed with pale amber; edges and reverse of petals rich creamy white.

Madame Lambard (T.)—A fine variety; color bright rosy crimson, occasionally pale light rose; very sweet and beautiful.

Madame Pauline Labonte (T.) (better known as **Duchesse De Brabant**) — A beautiful rose, very fragrant; color, salmon rose delicately tinged and shaded with fawn and amber; a profuse bloomer.

Madame Welche (T.)—An erect and vigorous habit; flowers very large and double; color, soft apricot yellow with dark orange center; sometimes shaded with copper red; fragrant.

Madame Willermoze (T.)—A lovely creamy white rose, tinged and shaded with blush; extra large size, very full and double; exceedingly sweet tea scent; unusually fine.

Marchioness of Londonderry (H. P.)—Color, ivory white; petals of great substance; very highly colored; a fine bloomer.

Marchioness of Lorne (H. P.)—Cup-shaped flowers of an exceedingly rosy color, slightly shaded in the center with pure carmine; very sweet.

Margaret Dickson (H. P.)—This rose is almost pure white in color, strong in growth and quite free flowering; one of the finest Hybrid Perpetual roses introduced in recent years.

Marie Van Houtte (T.)—White, slightly tinted yellow petals, often edged with rose; flower quite full and well formed; a good rose both in bud and open.

Marquise De Vivens (T.)—A novel shade of rich violet crimson, with center and base of petals creamy yellow, exquisitely tinted salmon and fawn; large, full flowers, very sweet and a constant and profuse bloomer.

Marshall P. Wilder (H. P.)—Bright cherry carmine; very fragrant, fine, clear foliage; one of the most satisfactory of this class.

Medea (T.)—Lemon yellow, with canary yellow center; large size; very full, deliciously perfumed.

Meg Merrilees (Briar)—Gorgeous crimson; very free flowering; one of the best.

- Merveille De Lyon (H. P.)**—White center, slightly rosy-peach; a grand, full, cup-shaped flower of large size, hardy and free.
- Mlle. Cecile Bruner (P.)**—The most popular of the Polyantha roses. A charming, fairy-like variety of sweet, delicate fragrance; color, salmon pink with light salmon center; too well known to need further description.
- Mrs. Cleveland (H. P.)**—A grand new scarlet variety; beautiful pointed buds, magnificent when open; the finest red sort we have to offer. It was awarded California State Floral Society's Medal. Foliage, clean and vigorous; very fragrant; flowers do not fade quickly after having been cut.
- Mrs. John Laing (H. P.)**—An Hybrid Perpetual rose, one of the finest of its class; color, clear bright pink, exquisitely shaded; the buds are long and pointed, and the flowers extra large and full, borne on long stems, and exceedingly sweet. It must be classed as a superb rose.
- Mrs. R. G. Sharman Crawford (H. P.)**—Deep rosy pink; outer petals pale flush; base of petals white; large and of perfect form. Received gold medal of the National Rose Society.
- Niphetos (T.)**—Of dwarf habit, producing in the greatest profusion large, elongated buds of snowy white; flowering continuously in winter as well as in summer; a magnificent variety.
- Papa Gontier (T.)**—A splendid variety, valuable for open and greenhouse culture; it is a strong, vigorous grower and free bloomer; the buds are extra large, finely formed and very beautiful; flowers, double and full and exceedingly sweet; color, bright cherry red, passing to rich, glowing crimson; petals, shaded with yellow, very striking and handsome.
- Paul Neyron (H. P.)**—Extra large and full; fine form; deep carmine color; very fragrant; free bloomer; an excellent rose.
- Paul's Early Blush (H. P.)**—A superb rose in every respect—the kind we have too few of; color, light silvery blush; large, fine, bold shape, producing its flowers among the first and continuing throughout the season. Won first prize International Exhibition. We would recommend our customers to plant freely of this variety.
- Perle Des Jardens (T.)**—Fine straw yellow, sometimes deep canary yellow; very large and full, and the most perfect form; one of the finest roses grown; steps at once into fame as the finest dwarf yellow rose we have.
- Perle d'Or (P.)**—Charming and very distinct; color, coppery gold, changing to fawn and salmon; flat-rayed form, very double and elegantly perfumed; a constant and profuse bloomer.
- President (T.)**—Same as Adam.
- Prince Camille De Rohan (H. P.)**—Rich, dark, velvety crimson, changing to scarlet maroon; full, double and sweet.
- Princess De Sagan (T.)**—Rich crimson tea rose of a velvety texture; blooms abundantly and is very handsome both in bud and when in full bloom.
- Rainbow (T.)**—The color is a lovely shade of deep coral pink; beautifully striped and mottled in a most unique manner with intense glowing crimson, elegantly colored in center with rich gold and amber; makes beautiful buds and the flowers, which are extra large, are very sweet and of great depth and substance.
- Robert Scott (H. T.)**—Clear rosy pink, shaded to flesh on the outer petals; flowers very large and well formed and a magnificent acquisition to the Hybrid Teas.
- Rose Bradwardine (Briar)**—Beautiful clear rose, free and distinct; one of the best of its class.
- Rubens (T.)**—Lovely pale yellow, slightly tinged with fawn, very double, sweet and large, full flower; very desirable.

- Safrano (T.)**—One of the old favorites; a constant bloomer; color, a shade between buff and apricot; indispensable to the garden.
- Senator Vaisse (H. P.)**—Fine dazzling red; large, double and fine form; very free bloomer.
- Shirley Hibbard (T.)**—Beautiful nankeen yellow; long, pointed buds, borne on heavy stems; a very free bloomer and one of the most satisfactory roses of this unusual color.
- Soliel d'Or (Briar)**—Varying from orange yellow to reddish gold, shaded with nasturtium red; conical shaped buds, opening to large, full flat-shaped flowers; very hardy and free blooming.
- Souvenir De Madame Pernet (T.)**—Salmon pink, base of petal shaded with yellow; extra magnificent variety.
- Souvenir De Malmaison (B.)**—Hardy; free blooming; of beautiful, clear flesh color; edges bluish. Superb.
- Souvenir De Pierre Notting (T.)**—Apricot yellow, blended with coppery yellow; bud long, opening to a large, full flower.
- Souvenir De Theresa Levet (T.)**—Brilliant red, shaded with dark crimson; flowers of good size and substance and a good bloomer.
- Souvenir De Wooten (T.)**—Beautiful bright crimson, changing to deep red; beautiful buds and double flowers; a good bloomer and one of the finest red teas.
- Souvenir D'Un Ami (T.)**—Salmon rose shaded, reverse of petals silvery pink; large, globular-shaped buds, very full; a splendid variety.
- Souv. Du President Carnot (H. T.)**—Large, full, double exquisitely shaped flowers, with heavy, thick, shell-like petals. The buds are long and pointed like *Niphetos*—perfection in every line. The color is new, delicate, rosy blush, shaded a trifle deeper at center of the flower. Fragrance delicious, strong grower and free bloomer; has no weak point.
- Striped La France (H. T.) (Madame Angelique Veysset)**—This rose combines all the good qualities of La France in growth, fragrance, shape of bud and flowers; a free bloomer; nicely striped, the marking plain and distinct, and the variegation a beautiful bright rose and satiny pink.
- Sunrise (T.)**—In close bud form it shows a deep coppery pink, but as the flower opens, the inner side of the petals shade from a clear yellow to a deep copper, making a very pretty color effect. The fragrance is delightful, much the same as the old rose, *Bon Silene*. The young foliage comes of a copper-bronze, and as it grows older, changes to a deep green.
- Sunset (T.)**—Identical in every respect with *Perle des Jardins*, except that its color is that of rich saffron and orange.
- The Queen (T.)**—A pure white sport from *Souvenir d'un Ami*; a vigorous and healthy grower, and continuous bloomer, producing a great abundance of buds and flowers all through the season.
- Ulrich Bruner (H. P.)**—This we consider one of the most satisfactory of all the Hybrids. Flowers, large, full and sweet; color bright, clear red; a profuse bloomer and hardy grower.
- Viscountess Folkstone (T.)**—Creamy pink; large, full and sweet; a vigorous grower and an excellent rose in every respect.
- Vick's Caprice (H. P.)**—A striking rose, totally unlike any other variety. The flowers are large, slightly cup-shaped, but full and deep; the petals are thick and lasting, having a ground color of clear, satiny pink, distinctly striped and dashed with white and bright carmine.

White La France (Augustine Guinoisseau) (H. T.)—This magnificent rose is a pure white La France, having just a breath of rose-tinted blush, decidedly clouding the depths of its broad petals; the buds and flowers are extra large, very full and finely formed; the fragrance is delicious. It is a free, continuous bloomer.

White Mamam Cochet (T.)—Identical with the pink of the same variety; beautiful white buds, long and pointed; very sweet and graceful; one of the best of the newer white varieties.

Wichuriana—This hardy and lasting rose creeps over the ground like ivy. The leaves are glossy, dark green, and handsomely notched. The flowers, which are borne very profusely during July, are large, pure white, single, with yellow center, and have a strong, wild rose fragrance. It is one of the very best plants for rock work, embankments, slopes, cemeteries, etc.

Xavier Olibo (H. P.)—One of the darkest roses extant. Clear color; very sweet and a free bloomer.

CLIMBING ROSES--Tested

Price—25c each; \$3.00 per dozen; extra size, 50c each; \$5.00 per dozen.

Baltimore Belle—Pale blush, changing to white; very vigorous.

Banksia (White)—Thornless; small, sweet flowers in bunches; very rampant grower.

Banksia (Yellow)—Same as the preceding flower; bright yellow; good bloomer.

Beauty of Glazenwood (also known as the **San Rafael Rose**)—Flowers bright coppery yellow, borne in large clusters; a free grower and splendid bloomer in the spring time.

Caroline Goodrich (Climbing General Jacqueminot)—Those desiring a good dark climber will be pleased with this variety. It is a strong grower and fair bloomer. Color, dark, velvety red.

Celine Forester—Deep, rich canary yellow; flowers well formed, tea scented and an excellent sort.

Cherokee (Double)—White; a rampant climber; very sweet scented.

Cherokee (Single)—One of the finest pillar roses in cultivation. Large, clear, white, single flowers, full of bright yellow stamens in center, which give it a most unique appearance. Foliage dark, rich green; a most vigorous grower.

Cheshunt Hybrid—Cherry-carmine; large and full flowers.

Chromatella—Clear, bright yellow; good form and substance; large; very full and double; very sweet, much prized for a pillar or veranda rose.

Clarie Carnot—Flowers of medium size; color, fine coppery rose, borders of the petals lightened with white and rosy carmine; a superb variety; very distinct.

Climbing Caroline Testout—This is probably the most popular of all the climbing pink roses. The flower is identical with the parent and it is of the most rampant growth; and free blooming quality.

Climbing Cecile Bruner—The flower of this variety is identical with the well known Buttonhole Rose. It is a very strong grower and a free bloomer and it should have a place in every garden.

Climbing Devoniensis—Large, creamy white, shell-like petals of great substance. Large, full and very fragrant.

Climbing K. A. Victoria—One of the best of the white climbers. Flowers identical with K. A. Victoria, which we consider sufficient endorsement.

Climbing La France—A sport from La France, and identical with it in every particular, save its climbing habit of growth. One of the most magnificent climbing roses. It is a strong, rapid grower, producing its splendid, large, delicate, silvery pink flowers in great abundance.

Climbing Malmaison—Identical with the older variety. An extra strong climber.

Climbing Niphetos—A splendid companion to the Climbing Perle des Jardins. Color, pure white, with pale lemon center; beautiful, long, pointed buds; very fragrant.

Climbing Papa Gontier—One of the best of the red climbers; flowers, beautiful, long and pointed; color, a beautiful shape of deep rose; a very free bloomer.

Climbing Perle Des Jardins—Habit of growth is vigorous, young plants often sending up shoots six to eight feet high in one season, with rich, glossy foliage, and bright red stems. The flowers are produced in profusion, and are deep canary yellow.

Climbing Safrano—(See *Reve D'Or*.)

Climbing Wooten—A fine, red climber. Flowers deep, rich red; borne in great profusion on long, clean stems; a very free bloomer; flowers of good substance.

Cloth of Gold—Deep yellow center, with sulphur-colored edges. A good climber.

Coquette Des Alps—A profuse bloomer; flowers pure white, sometimes shaded with blush; very desirable; should be in all collections.

Crimson Rambler (Polyantha)—Of remarkable vigorous growth, making shoots from eight to ten feet high in one season. Flowers of brightest crimson, and produced in great pyramidal panicles, each having thirty to forty blooms. Does not bloom as freely the first as subsequent years, as the flowers appear on the previous year's wood.

Dorothy Perkins (Wich.)—Soft light pink; flowering profuse in large clusters; very fragrant and lasting.

Francois Crousse (H. T.)—A beautiful new French rose of much merit. Bush of strong growth, producing throughout the season a wealth of large, deep cherry red flowers. A gem for the south and west.

Glorie De Dijon—A magnificent old rose, one of the very finest in every respect; large, perfectly double, and tea scented; color, rich creamy yellow, shaded with lovely amber.

Glorie De Margottin—The brightest rose grown; deep, rich scarlet, which does not fade as the flowers get old; an excellent bloomer, good grower, and without doubt the coming red climber.

James Sprunt (or Climbing Agrippina)—Rich, dark crimson; free bloomer; strong grower.

La Marque—Almost pure white; beautiful buds; large, full flowers; very sweet; too well known to need further comment.

Madame Alfred Carriere—A beautiful waxy white flower, large and full; one of the best.

Marechal Niel—One of the largest and most beautiful roses grown; flowers extra large; very double and deliciously perfumed; deep golden yellow; buds of immense size.

Ophire—Reddish copper; medium size; fine cupped form; full and sweet; desirable.

Pink Rambler—The same habit and style as the well known Crimson Rambler. Color, a bright, clear pink; sweet and beautiful.

- Prairie Queen**—Strong, vigorous grower; clear, bright pink; blooms in clusters.
- Red Marechal Niel**—Identical in growth with the older variety. Color, clear, bright red; full and sweet; an extra good sort.
- Reine Marie Henriette**—An extra fine climbing variety; flowers large, full and handsome; color, clear cherry red; a grand acquisition to climbing roses.
- Reine Olga De Wurtemberg**—Large, full and fine; color, bright cherry, and occasionally tinted with white. A new color in climbers, and we cheerfully recommend it.
- Reve D'Or**—Climbing Safrano, beautiful rose color, pale orange yellow or rosy buff; good size; full and sweet; vigorous.
- Solfaterre**—Fine, clear sulphur yellow; good form, large, full and sweet.
- William Allen Richardson**—Coppery yellow, flushed with carmine; flowers large, full and fragrant.
- White Marechal Niel**—The newest of the climbing roses. Flowers of the same size, flavor and substance of this old but most popular variety. A grand acquisition to our climbing roses.
- White Rambler**—Counterpart of the Crimson Rambler; color, pure white.
- Yellow Rambler**—Clear golden yellow; one of the best of the Ramblers.

MOSS ROSES---Tested

Price—25c each; \$3.00 per dozen; extra size, 50c each; \$5.00 per dozen.

Admired for the beautiful moss covering of the buds. The Moss Roses are harder than those of any other class and produce immense numbers of flowers. Every garden should have a few specimens. The varieties contained in the following list are all good:

- Crested Moss**—Deep pink color; buds surrounded with a mossy fringe and crest; free from mildew; a fragrant and beautiful rose.
- Eugene Guinoisseau**—Cherry red; very pretty.
- Glorie of Mosses**—A beautiful blush; very large and full; grows very robust; one of the best.
- Perpetual White**—Pure white, blooming in clusters.
- Princess Adelaide**—Fine, strong grower; flower, bright rosy pink.
- Raphael**—Large buds densely covered with lovely moss; color, pinkish white, shaded with rose; large, full and sweet.

SWEET BRIAR ROSES---Tested

- Common Sweet-Briar**—Single pink flowers; foliage very sweetly scented.
- Rosa Rugosa**—A new red-briar rose from Japan.
- Yellow Persian**—Deep, bright yellow; small but prettily shaped; the foliage has a faint scent of the common sweet-briar.

STANDARD ROSES---Tested

Price—\$1.00 each; \$12.00 per dozen; extra size, \$1.25 each; \$15.00 per dozen.

We devote much time and space to the cultivation of Standard Roses and the stock we offer for this season is large and complete. The roses are budded on prepared stocks, that will not sucker, and are from 3½ to 4 feet in height. The stems are clean and straight, heavily rooted, and the crowns well shaped and thrifty. After experimenting for many years on the varieties that grow the best in this form, we have selected several dozen that will embrace all of the principal colors and give splendid successions of flowers.

CARNATIONS

Many people do not succeed well with the Carnation as a garden flower. The principal reason for this is that they select the varieties with which they are familiar and are always seen in the florists' windows. These sorts are usually unsuitable for garden planting, and we recommend the kinds named here for outside planting.

Price of Large Flowering Plants, 25c each; \$2.50 per dozen.

Price of Smaller Plants, 15c each; \$1.50 per dozen.

During February, March and April, we can supply **Young Rooted Cuttings** at **\$1.00 per dozen.**

Aristocrat—Beautiful cerise pink; very large flowers, borne on very heavy stems; perfect in form and calyx does not burst; very free flowering, early and continuous.

Boston Market—Pure white; very fragrant; exceedingly free blooming, early and continuous; very healthy and vigorous; one of the best garden sorts.

Edward Schwerin—One of the best of the older pink varieties; flowers of a beautiful shade of pink; fringed and fragrant; stems, long and stiff; a valuable variety.

Enchantress—Color, delicate flesh pink, deepening towards the center; very large form; stem, long and stiff. A universal favorite.

Estelle—Probably the most satisfactory of all the scarlets; extra bright color; free blooming, heavily fringed; very fragrant. This variety has surpassed most of the older sorts of the same color.

Flora Hill—One of the older ideals, but still very popular; flowers deliciously fragrant; very heavily fringed, borne on long stems; a very remarkable variety for the garden.

Harlowarden—One of the darkest reds in cultivation; large, full, fringed and sweet; good bloomer.

J. A. Carbone—A mottled salmon streaked with pink and rose and a faint touch of white; very distinct and beautiful.

Mrs. Patten—One of the best of the striped varieties; clear white ground beautifully penciled with pink stripes.

Mrs. T. W. Lawson—Flowers of immense size, borne on strong, heavy stems; color, dark cerise pink; an extra good bloomer.

Prosperity—Pure white, with light penciling of pink on the edges and through the center of the petals; a large flower; very distinct and beautiful.

Rose-Pink Enchantress—A pure, clear pink flower without markings, having the extra large size and the other good qualities of a good Enchantress. It is bound to become a garden favorite.

White Enchantress—This is a pure glistening white; a sport from the Enchantress and just as large and fine as that excellent variety, deliciously sweet.

White Lawson—A sport from Mrs. T. W. Lawson; measures 3 inches in diameter; flowers beautifully fringed and fragrant.

Winsor—A clear rose pink, flowers borne on heavy stems, a good bloomer, one of the best.

HARDY ORNAMENTAL AND FLOWERING TREES

Acacia Armata—One of the most effective of the dwarf varieties. Can be grown among other shrubbery where its weeping habits make it indispensable for park planting. Price from 25c to 50c each; \$2.50 to \$5.00 per dozen.

HARDY PALMS, DRACAENAS, AGAVES, YUCCAS, BAMBOOS, ETC.

The growing demand for this class of plants induces us to give them a large share of attention. We have a very large assortment of hardy palms, suitable for out-door planting, which make beautiful and impressive plants for lawns, tubs or general garden purposes. Below will be found a list of the principal varieties that are absolutely hardy in this climate.

- Agave Americana.**—Green Century Plant. **Price—50c. to \$1.00 each.**
- Agave Folia Variegata (American Variegated Century Plant).**—Excellent plants for large vases or lawn specimens. **Price—50c. to \$1.00 each.**

Arundo Donax Variegata.—A magnificent reed growing from 10 to 20 feet high; leaves beautifully striped with white; magnificent for massing with shrubbery. Price—50c each.

Bamboo Giant Japanese.—The largest growing of the Bamboos; attains a height of 50 feet. Price—\$1.00 each.

Bambusa Falcata (Japanese Bamboo).—A most effective and elegant plant where lightness and gracefulness are required; makes a splendid hedge and grows in any situation. Price—50c. to \$1.00 each.

Bambusa Japonica.—Of dwarf growth, with large leaves; very fond of water. Price—25c. to \$50c.

Bambusa Japonica Variegata.—Beautiful feathery variegated foliage; attains the height of ten feet. Price—50c. to \$1.00 each.

Brahea Edulis.—This is one of the most satisfactory of the native Fan Palms; beautiful dark green color and clean habit; of easy culture and beautiful growth. It is valuable for either sidewalk planting or for growing in tubs. Price—50c. to \$1.00 each; large specimens—prices on application.

Chamaerops Excelsa.—A very hardy Palm, with an erect stem, growing to 30 feet high; dark green, erect, fan-shaped leaves, deeply cut into narrow segments. This variety does not grow very broad and for this reason makes one of the most satisfactory sidewalk trees possible to plant; can be used in tubs where their slowness of growth makes them very desirable for ornamental purposes. Price—50c. to \$5.00 each.

Chamaerops Humilis.—This has the general appearance of all this family, but is of very slow growth. The leaves are beautiful fan-shaped, while the stems are covered with numbers of short thorns; for lawn planting this is excellent. Price—\$1.00 to \$5.00 each.

Corypha Australis (Cabbage Palm of Australia).—Grows to an immense size but rather slowly. Leaves, fan-like shape, of dark green color, and of great substance. Price—50c. to \$1.00 each.

Dracaena Cannaefolia.—Similar to the following, but with much wider leaves. Price—50c. to \$1.00 each.

Dracaena Stricta (Australis).—A palm-like tree with long sword-like leaves, invaluable in landscape gardening; very popular for sidewalk planting; of easy growth. Price—25c to \$1.00 each.

Erythrae Armata (Brahea Glauca).—A handsome palm with lightish blue leaves; very slow growth, but very effective. Price—\$1.00, \$2.00, \$3.00, \$5.00 each.

Eulalia Japonica Zebrina.—A strong growing ornamental grass; leaves beautifully cross striped with white; very distinct. Price—25c. to 50c. each.

Fourcroya.—Similar in growth to the Dracaenas, but with heavier foliage. Price—25c. to 50c. each.

Musa Ensete (Giant Banana of Abyssinia).—Attains a height of 30 feet; the leaves occasionally grow 20 feet long; it is hardy in California and should be extensively planted for its tropical effect. Price—50c. to \$2.50 each.

Phoenix Canariensis.—One of the hardiest of the Date Palms, with dark green feathery foliage; of strong and rapid growth; valuable both for inside and outside decoration. This easily takes first place to all the varieties of palms cultivated in California. Price—from 50c. upward.

We also have these in large tubs suitable for decoration. Prices on application.

Phoenix Dactilifera.—A common Date Palm of North Africa and Southern Asia; rapid growth; strong, healthy and beautiful. They bear a great deal of neglect and a good deal of frost. Price 50c to \$1.50 each.

Phoenix Reclinata.—Very hardy; leaves very heavy and reclining; one of the best of the species. Price—50c. to \$1.50 each. Price of large specimens on application.

Phoenix Tenuis.—This is a very hardy, graceful and desirable variety of the Date Palm. It is not such a rapid grower as the varieties mentioned before, but is distinctively characteristic. Price—50c. to \$1.50 each.

Prichardia Filifera (Brahea Filamentosa).—California Fan Palm. This is a native of California and is one of the most handsome and vigorous varieties in cultivation. It attains a height of 50 feet and the large fan-shaped leaves give it a very tropical appearance. It has come to great favor as a sidewalk tree and should be extensively planted for this purpose. Price—50c. to \$2.50 each. Price of large specimens on application.

Washingtonia Robusta.—Resembles the Prichardia Filifera, but of a slower and more compact growth; one of the most valued Fan Palms in cultivation. Price—50c to \$2.50 each. Price of large specimens on application.

Yucca Aloefolia Quadricolor.—Similar to the following, but with more color in the leaf markings; very valuable for pot culture. Price—50c. to \$1.00 each.

Yucca Aloefolia Variegata.—Leaves long and pointed; beautifully striped with white; flowers of delicate creamy color, borne in masses on a long spike. Price—50c. to \$1.00 each.

Yucca Flacida.—A dwarf variety with thin, narrow leaves; blooms profusely during the Summer. Price—50c. each.

Yucca Gloriosa.—Light green leaves; very hardy; throws up a magnificent shaft of bloom, sometimes called Adam's Needle. Price—50c.

HARDY HOUSE PLANTS

Asparagus Plumosus.—The most satisfactory green-house climber in existence; of the easiest culture and rapid growth; invaluable for massing with flowers. Price—25c. to 50c.

HARDY FERNS

Ferns naturally grow in moist woods, and want either full shade, or to be partially screened from the rays of the sun. Some of our ferns are perfectly hardy, and others will want to be moved indoors during the cold weather. If grown indoors, they should be kept in the shade and not too wet.

- Adiantum Cuneatum.**—The well known Maiden's Hair Fern; delicate, beautiful foliage; always in demand as a house plant. **Price—25c. to 50c.**
- Adiantum Cuneatum Roenbecki.**—A stronger grower than the above. We can recommend this variety. **Price—25c. to 50c.**
- Adiantum Gracillimum.**—A most elegant fern, with very light and graceful fronds; very thin and deep green when matured. **Price—25c. to 50c.**
- Adiantum Pedatum.**—One of the easiest grown of the Maiden Hairs. Fine, long fronds. **Price—25c. to 50c.**
- Boston Fern (Nephrolepis Exaltata Bostoniensis).**—This grand fern has become very popular. It is one of the very few plants that will thrive under ordinary house care. It grows well and improves in size where most all other ferns fail. The fronds droop and arch gracefully over the edge of a pot or basket, and as it is a very rapid grower it is not long before they reach the floor from an ordinary parlor table. **Price—35c. to \$1.00. Larger plants—\$1.50 to \$5.00 each.**
- Nephrolepis Whitmanni.**—The finest fern yet introduced. It is somewhat similar to the Piersoni, but more compact and more sturdy in its growth. **Price—25c. to \$1.50 each. Larger plants—\$2.00 to \$5.00 each.**

Lewelling (Black Republican)—Large size; a cross between Napoleon Bigarreau and Black Tartarian, having the solid flesh of the former and the color of the latter. Very late and good.

Napoleon Bigarreau (Royal Anne)—A magnificent cherry of the largest size; pale yellow, becoming amber in the shade, with a bright red cheek; flesh very firm, juicy, and sweet.

Early Richmond—Red, acid; valuable for cooking.

JAPANESE PLUMS

35c each; extra size, 50c each.

Since the introduction of the Kelsey Japan Plum—the latest of all to ripen—many new varieties of the Japanese type have been introduced, ripening from June to September. As a class the Japanese Plums are quite distinct from the European varieties, being of more vigorous growth while young, with large, luxuriant foliage, and beginning to bear at an early age. They have all proven excellent shippers, can be picked before fully matured, and will color up afterwards, and have been found to be admirably adapted to our interior valleys, where the European varieties suffer from the hot sun during the ripening season.

Burbank—Tree vigorous grower, with strong, upright shoots; large, broad leaves; bears early; fruit very large, rich cherry red, slightly mottled with yellow; flesh deep yellow, juicy, very sweet; agreeable flavor. August.

Kelsey Japan—Fruit very large; greenish yellow, covered with red on the sunny side; flesh very solid and firm when ripe; juicy, and with a rich, vinous flavor; pit very small. September.

Wickson—Fruit very large, glowing carmine with a white, heavy bloom; flesh firm, sugary, delicious; stone small; remarkable for its long keeping qualities; tree of vigorous, upright growth.

PLUMS---General Collection

35c each; extra size, 50c each.

- Bradshaw**—Very large; dark violet red; juicy and good; fine early plum, adhering partially to the stone. July and August.
- Cherry**—A very early, medium-sized plum; pale red, sweet, juicy, and sub-acid. June and July.
- Coe's Golden Drop**—Large and handsome, oval; light yellow; flesh firm, rich, and sweet; adheres to the stone. September.
- Columbia**—Very large; round; brownish purple; very rich and sugary; parts freely from the stone. August.
- Damson**—Small, roundish, oval; dark purple; much used for preserves. September.
- Duane's Purple**—Very large and handsome; oval; reddish purple; juicy and moderately sweet. August.
- Early Golden Drop**—Small, bright yellow; sugary and rich; separates freely from the stone. Early July.
- Green Gage**—Small, but of the highest excellence; round, greenish yellow, with brown dots; very juicy and sweet. August.
- Jefferson**—A fine variety; large, oval; yellow, with a reddish cheek; flesh very rich, juicy, luscious, high flavor; parts freely from the stone. August.
- Peach Plum**—Very large, roundish, brownish red; coarse grained, but juicy; pleasant, sprightly flavor. July.
- Red Egg (Red Magnum Bonum)**—Large, oval, deep red; rather firm and coarse, with a sub-acid flavor. July and August.
- Victoria (Sharp's Emperor)**—Large, round, oval; light yellow, marbled and shaded with light lilac and purple; flesh golden yellow. August.
- Washington**—A magnificent large plum, roundish; deep yellow, with a pale crimson blush; flesh yellow, firm, very sweet and luscious, separating from the stone. July and August.
- Yellow Egg**—A very large and beautiful, egg-shaped, yellow plum; flesh yellow; rather acid until very ripe, when it becomes sweet. August.

PRUNES---General Collection

35c each; extra size, 50c each.

- Fellenberg (Large German Prune, Swiss Prune, Italian Prune)**—Medium size, oval, dark purple; flesh juicy and delicious; parts from the stone; fine for drying.
- French (Petite d'Agen, Burgundy Prune)**—The well known variety so extensively planted for drying; medium size, egg-shaped, violet purple; juicy, very sweet, rich, and sugary.
- German**—Long, oval and swollen on one side; skin purple, with a thick blue bloom; flesh firm, sweet with a peculiar, pleasant flavor; separates readily from the stone. September.
- Golden**—Originated from seed of the Italian Prune; somewhat larger than its parent; of light color, exquisite flavor, and dries beautifully.
- Hungarian (Gross Prune, Pond's Seedling)**—Very large, dark red; juicy and sweet. Its large size, bright color, productiveness and shipping qualities render it a profitable variety for home or distant market.

PRUNES—Contd.

Silver—A seedling of Coe's Golden Drop, which it much resembles. It is entitled to rank with the best drying plums and prunes, because of its large size, handsome appearance and superior flavor.

Tragedy—A cross between the German Prune and Duane's Purple; medium size; skin dark purple, flesh of yellowish green, very rich and sweet; frees readily from the pit; its early ripening (in June) makes it very valuable as a shipping fruit.

PEACHES---Freestone Varieties

35c each; extra size, 50c each.

Alexander—The best very early freestone; medium to large size; greenish white, nearly covered with a deep, rich red; very juicy, sweet and of good quality.

Hale's Early—Medium size and nearly round; skin greenish, mostly covered with red when ripe; flesh white, melting, juicy, rich, sweet.

Strawberry—Medium size, oval; skin marbled with deep red; flesh whitish, juicy, rich and of a very delicious flavor.

Foster—A large, yellow peach, resembling Early Crawford, and ripening a few days earlier; the fruit is very uniform in size.

Early Crawford—A magnificent, large, yellow peach, of good quality; its size, beauty, and productiveness make it one of the most popular varieties.

Elberta—Large, yellow, with red cheek; juicy sweet and highly flavored; tree grows strong and healthy and very productive. Ripens in August.

Muir—An excellent bearer and does not curl; fruit large to very large; a fine shipper, and one of the best canning peaches in the United States; as a drying peach, it excels all others ever introduced.

Susquehanna—A large, handsome variety, nearly globular; skin rich yellow, with beautiful red cheek; flesh yellow, sweet, juicy, with a rich, vinous flavor.

Salway—A large, yellow English peach, with deep yellow flesh; very juicy, melting and rich; the most valuable late market variety.

PEACHES---Clingstone Varieties

35c each; extra size, 50c each.

Phillip's Cling—Fine, large yellow; flesh firm, clear, yellow to the pit, which is small; flesh of finest texture. The best of all clings for canning purposes. Ripens in September.

Tuscan Cling—A fine early cling of excellent flavor; in good demand for both canning and shipping; ripens with Early Crawford.

APRICOTS

35c each; extra size, 50c each.

Blenheim (Shipley)—Above medium; oval; orange, with a deep yellow; juicy and tolerably rich flavor; vigorous grower and regular, prolific bearer.

Hemskirke—Strongly resembles the Moorpark in size and color, but differs from that variety in ripening a little earlier and more evenly. July and August.

Moorpark—One of the largest, most popular and widely disseminated apricots; deep orange or brownish red; flesh quite firm, bright orange, parting freely from the stone, quite juicy, with a rich and luscious flavor; a favorite canning variety. August.

Royal—A standard variety; skin dull yellow, with an orange cheek; flesh pale orange, firm and juicy, with a rich, vinous flavor. July.

NECTERINES

35c each; extra size, 50c each.

Boston—Large, deep yellow, with a bright blush and deep mottling of red; flesh yellow, without any red at the stone; sweet, though not rich, with a pleasant and peculiar flavor.

New White—Fruit rather large, nearly round; skin white, with a slight tinge of red when exposed; flesh white, tender, very juicy, with a rich, vinous flavor. August.

QUINCES

35c each; extra size, 50c each.

Apple or Orange—Large, roundish with short neck; fruit a beautiful bright golden yellow color; an old favorite sort. September.

Pineapple (New)—The name is suggested by the flavor. The fruit resembles the Orange Quince but is smoother; of excellent quality.

Smyrna (New)—The fruit of this superb variety is very large and of a lively lemon-yellow color; tender and delicious when cooked.

FIGS

35c each; extra size, 50c each.

Adriatic (Grosse Verte)—The best dried figs have been produced from this variety; tree a strong and healthy grower; fruit above medium size; skin white and thin; pulp red, fine, exceedingly aromatic and changes to an amber color when dried.

California Black—The well-known local variety; fruit large, dark purple, almost black when fully ripe; makes a good dried fig; tree grows to a very large size, and bears immense crops.

Smyrna—A variety imported by the Bulletin Company of San Francisco, from Smyrna.

White Genoa—Fruit very large; flesh brownish purple, rich and fine grained; skin light green; it produces large crops during the entire season until October.

White Ischia—Small, pale greenish yellow; flesh purple, highly flavored and luscious; will ripen its fruit along the coast, where the finer varieties do not mature.

Calimyrna—The genuine Smyrna Fig; large fruit, heavy bearer, skin lemon-yellow, pulp reddish amber; tree a strong grower.

NUT TREES

ALMOND---Soft Shell Varieties

35c each; extra size, 50c each.

I X L—Tree a sturdy, rather upright grower; nuts large, hull easily; shell soft, but perfect.

ALMOND---Paper Shell Varieties

Nonpareil—Of a weeping style of growth, but still forms a beautiful tree; an extraordinary heavy and regular bearer, with heavy thin shell; of the Paper Shell type.

Paper Shell—Medium size; shell very tender; easily broken between the finger and thumb; kernel large, white, sweet and relishing

CHESTNUT

35c each; extra size, 50c each.

Italian, or Spanish—A highly ornamental tree of free growth, esteemed alike for its beautiful foliage and valuable timber; the nut is sweet and generally large.

Japan Mammoth—A monstrous fruit, larger than the European, and flavored like the American Sweet; tree bears when quite young.

FILBERT

Soft Shell—Produces a great abundance of smooth, round nuts, with sweet and delicious kernels. **Price**—50c each.

WALNUTS

35c each; extra size, 50c to \$1.50 each.

California Black—A variety indigenous in this State; makes excellent shade and avenue trees.

Praeparturien (Dwarf Prolific)—This is a dwarf-growing, early-bearing variety, which matures its growth well, not suffering, therefore, from early frosts. Its leaves and blossoms appear about one month later in the Spring than the common English Walnut, and are consequently seldom, if ever, injured by late Spring frosts.

Santa Barbara Soft Shell—A variety originating with Joseph Sexton of Santa Barbara, Cal. The tree is a vigorous grower, an early and abundant bearer; the nut is large, the kernel white, sweet, and readily extracted, the shell being easily broken.

Franquette—Nut quite large; kernel full and sweet, of rich flavor; tree a good grower.

STRAWBERRY GUAVA

25c each.

The Guava is an ornamental evergreen shrub, with shining foliage, and bears when only two feet in height. The fruit is smaller than an English walnut, of a fine claret color, and with a flavor resembling that of a strawberry; makes an excellent jelly.

LOQUAT

25c to 50c each.

Large Fruited—An improved variety; blooms in Fall and ripens in the Spring; bears when quite young; fruit is in shape of a crab apple; small seeds; flavor rich, pleasant and sweet.

- Delaware**—One of the best of American grapes; bunches medium, compact; berries medium, round.
- Flame-Colored Tokay**—Bunches very large, and handsomely formed; berries large; skin thick, pale red, or flame-colored; flesh firm, sweet, with a sprightly and very good flavor; a splendid shipping grape.
- Isabella**—A strong-growing variety, specially adapted for arbors; bunches good size, somewhat loose; berries quite large, oval, black, covered with a blue bloom; juicy, sweet and rich, with a slight musky aroma.
- Malaga**—Vine a strong grower, and immensely productive; bunches very large; compact, shouldered; berry very large, oval, yellowish green; skin thick, fleshy.
- Muscat of Alexandria**—Bunches large, long and loose; berries large, slightly oval, pale amber when ripe, covered with a thin white bloom; flesh firm, brittle, exceedingly sweet and rich; fine flavored; the variety most extensively planted for raisins.
- Sultana**—Bunches compact, tapering; berries large, long and conical; skin thin, green, semi-transparent, becoming pale yellow as it ripens; pulp tender, seedless.
- Thompson's Seedless**—A seedless variety, resembling the Sultana in some respects, but in others much superior; extensively grown in Sutter County; and locally known by this name. In the vineyard of J. B. Onstott of Yuba City, the vine is exceedingly prolific, and the fruit very fine.
- Zinfandel**—Bunches large, compact, berries round, dark purple; covered with a heavy bloom; a valuable claret wine grape; succeeds well in almost any climate.

CURRANTS

\$1.00 per dozen; \$8.00 per hundred.

- Black Naples**—A beautiful fruit, the finest and largest of all black currants; highly esteemed for jelly.
- Cherry**—Fruit of the largest size; bunches short; berries large, deep red; a valuable market sort.
- Fay's Prolific**—This new currant continues to maintain all the claims made for it; it is as large as the cherry, more uniform, fruit less acid, fully as productive and decidedly earlier.
- White Grape**—Bunches moderately long; berries very large, whitish yellow, sweet and good; the finest of the white sorts.

GOOSEBERRIES---American

\$1.50 per dozen; \$10.00 per hundred.

- Downing**—An upright, vigorous grower; fruit good sized, roundish oval, whitish green; skin smooth; flesh soft, juicy and very good.

SWEET PEAS

Orchid-Flowered Sweet Peas

This type is distinguished from the standard sorts by the extraordinary size of their flowers and by the standard being crinkled and wavy. They usually bear four blossoms on a stem, and are as easy to grow as the commonest sorts. Owing to their being shy seeders they will always be higher in price than the standard sorts.

The sorts marked * are the kinds best suited for florists for cutting.

Notice to the Public

It is not the intention of the E. Gill Nursery Company to catalogue any Tree, Plant, Bulb or Seed in this Handbook that is not known to be an article of merit.

Many firms depend largely for their trade on expensive publications, embellished with showy illustrations and deceiving descriptions. Our continuous experience of fifty years in California vouches for our business stability, and gives us a standing that cannot be acquired by those inexperienced in Pacific Coast conditions.

We have in this half century of close observation found that it has never been necessary to resort to glaring pictures and ridiculous statements to attract the flower-loving public, and it is to those whose regard for the beautiful in nature it will be our constant effort to please, that we call to their attention the Tested Roses, Trees, Shrubs, Fruits, Seeds, and Bulbs in Gill's Handbook of Plants.

Digging Two-Year-Old Roses on Our Grounds at West Berkeley, California.

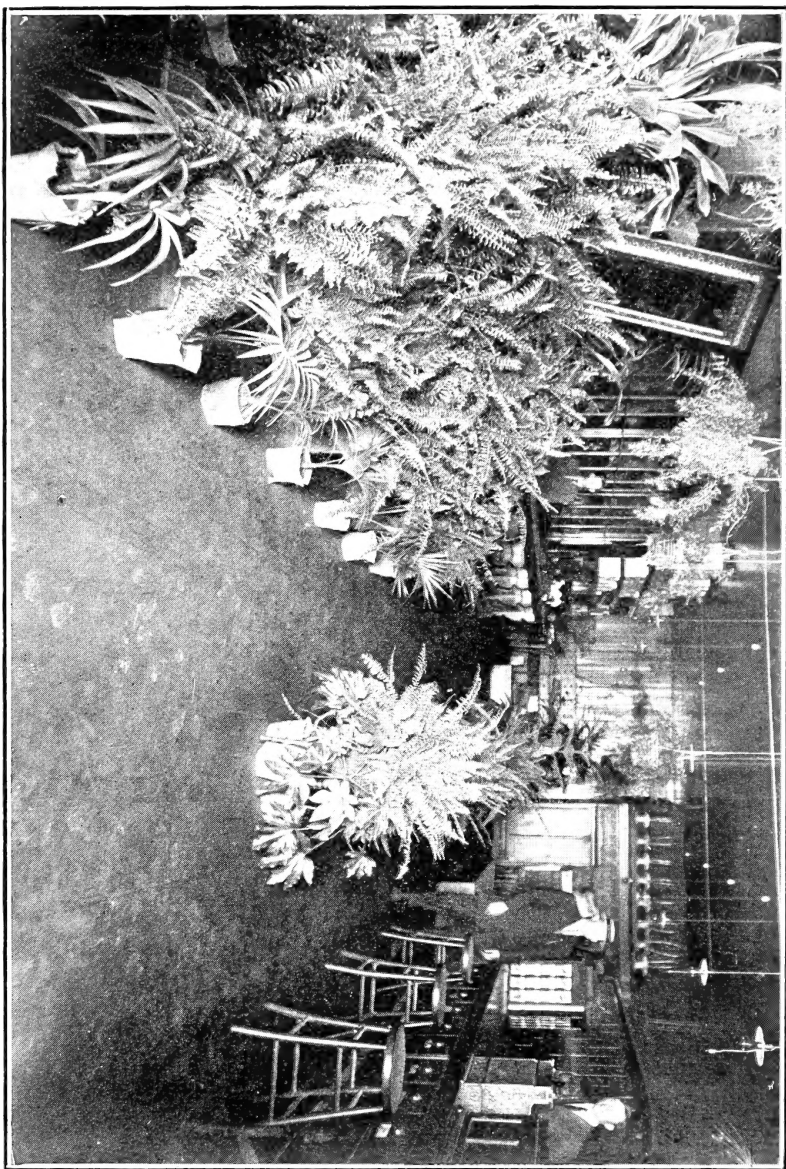

To parties who wish to purchase any article in larger quantity than is listed herein, we will make *Special Prices*.

Our facilities for handling large orders are unsurpassed.

Please send us your list of wants and we will promptly quote prices on the same.

Our Floral and Seed Department, Cor. 21st and Telegraph Avenue. Oakland, California.

A special invitation is extended to our friends and customers to inspect our stock of Cut Flowers, Floral Designs, Seeds, Bulbs, and House Plants carried at this place. A large assortment of Fruit, Shade and Ornamental Trees is kept constantly on hand in our Sales Yard.
